

N.E.S® Client Case Study.

Craig Hitchens Therapies® NES® case studies are done by collecting data during the application of NES® Quantum Bioenergetic therapy. My aim is to show the effectiveness of NES quantum bioenergetic therapy.

Information on Company & Client Studied

Client Information

Sex	Female
Age	33 years
Occupation	Clerk
Marital Status	Married
Condition Experienced	Hormonal Disturbances, Menstrual Tension, Poor Libido, Poor Sleep, Moodiness.

Company Information

Company Name	Craig Hitchens Therapies®
Address	74 Resort Drive
City, State, Post Code	Dunsborough, 6281, W.A. Australia
Phone number	0421213898
Web site address	http://www.craighitchenstherapies.com
Industry	Natural Health Care – Quantum Naturopathy
Number of employees	1
Contact name	Craig Hitchens
Title	Naturopath – Quantum Naturopathy
Phone number	0421213898
E-mail address	craig@craighitchenstherapies.com

Case Study for NES Effectiveness on Hormonal Disturbances and Associated Symptoms.

Pre-Study Health Symptoms & Brief Client Health History

The female subject we will call “D” is a normally healthy and vibrant young woman married and works full time. She has no other history of serious illness and has little or no record of poor health prior to this time. D then had Implanon implant placed into her as a contraceptive. After finding that this was not agreeing with her she requested it be removed and this is when her symptoms began. D began to suffer from skin break outs during the leutial phase of her menstrual cycle. D also had moodiness, poor libido to the point of it causing relationship problems, constantly sore breasts, insomnia, lethargy, digestive upsets and an inability to cope with stress. D was adamant that this was due to her having firstly used the Implanon and then having it removed. D also saw her doctor for medical tests but nothing was done or found according to her testimony.

Brief Background on Condition Suffered

The main condition here according to what D feels is a disruption of normal hormonal and digestive functioning as a result of the Implanon device being implanted and removed. Medical testing according to her found “nothing wrong or of significance”

Brief Background on Treatment Method – N.E.S.®

What it Is

The NutriEnergetics System® is the first and only instrument capable of accurately describing a full range of information about the location and causes of ill health. It quickly allows the practitioner to get to the root causes of illness and will often find factors that even the most sophisticated and expensive laboratory and imaging tests cannot detect. All this is done rapidly and non-invasively. Additionally, it gives precise information about the specific infocenticals needed to repair the body’s bioenergy field at the quantum level, bringing the body back towards optimal functioning, healing and well-being. It is a uniquely profound and effective system.

Background

In fact, the NES® is a revolutionary approach to health, the culmination of twenty-five years of work into how matter is actually structured in the body—the quantum electrodynamic field (QED). Developed by Peter Fraser, Harry Massey and a team of experts, the science behind NES® integrates research in the fields of physics, biophotonism, quantum biology, resonance phenomena, advanced mathematics, information technology, Western and Chinese medicine, homeopathy and nutrition. The result is the first accurate map of the human body-field. This discovery is as important as the recent mapping of the human genome or genetic structure. Because of its unique nature, this proprietary information has yet to be published in scientific journals.

The Human Bioenergy Field

While mainstream medicine focuses on chemistry as the basis of health and disease, natural medicine takes a less materialistic approach, understanding the human being as the interaction of many levels of subtle energy, pattern and meaning. Rather than a biochemical model of the body, natural therapies like homeopathy and acupuncture rely on a physics-based model of how the human organism works. Both tradition and science confirm that the body is pervaded by a quantum electrodynamic field. This human bioenergy field has a magnetic-vector structure that directs subatomic particles to their correct function in the body and controls all information transfer or communication between cells and organs. The bioenergetic field is the body's master control system, ultimately determining our chemistry, metabolism and cell structure. If the body's field pattern and cellular instructions are wrong, ill health will result.

How the NES® Works

For the first time in the history of science, the optimal map of the human biofield has been discovered and replicated within the vectors of computer software. The NES® instrument consists of a base unit and computer. The base unit acts as a receiver, a pathway for electrons and photons to carry information between the energy-field of the person and the bioenergy map stored in the computer. The NES® compares and detects differences between the optimal, ideal map of the body-field and the person's energy-field structure, using a graphic interface. As a quantum device, it does not actually test for specific toxins, parasites, viruses, etc. Rather, it looks for whether these factors have caused body-field damage, and the specific information-based remedies that will correct this disruption. These highly effective substances provide the quantum instructions needed to correct specific field imbalances.

NutriEnergetics Infoceuticals®

The NutriEnergetics Infoceuticals® are designed to repair the human body-field at the molecular and cellular level. They are prepared using the latest advances in field dynamics by imprinting a base of organic colloidal minerals with magnetic information corresponding to specific aspects of the ideal body-field. This information acts as a kind of signpost for the subatomic particles in the bioenergy field. By providing these core directions, any deviation away from the optimal map is brought back to normal. As the subatomic particles realign themselves, the energy field and physical body regain balance. One's self-healing capacity becomes active and enlivened again.

The Roadmap of Health

An important innovation of NES® analysis is the ability to determine the order in which the body is able to change and heal. In reality, the organism can only correct its problems in a very specific sequence, and this is why using supplements, and various natural remedies and therapies is often unsuccessful. For example, heavy metals and silent viral infections are two of the most common causes of chronic ill health. Yet before they can be eliminated, there must be improvements in the nervous and immune systems, intercellular communication and the body's capacity to detoxify. It can take several months before the organism can be directed to eradicate these damaging toxins. The NES® system provides the roadmap of how the body and mind can be brought back to an optimal state.

The NES® Analysis

The NES® detects a wide range of reliable and consistent information about one's current state of health. Future testing shows all changes, improvements or alterations that have taken place since the previous test. The broad categories of factors analyzed by NES are outlined below:

LOCATIONS

Energetic Integrators: The body's twelve interlocking fields (which include traditional acupuncture meridians) activate DNA and coordinate all body processes. Their integrity, strength and impact on health are determined.

Energetic Drivers: The relative over or under functioning of organs is displayed, including the nervous system, immune system, heart, lungs, liver, kidney, etc. (These are termed Energetic Drivers within the NES system).

FUNCTION & METABOLISM

The metabolic factors affecting health including the following:

Allergies & food intolerances: Wheat, dairy and other sensitivities, and the root causes behind them.

Metabolism: base rate, Ph, carbohydrate, protein, glucose, and sugar metabolism, enzyme function, etc.

Nutrition: vitamins, minerals and fat metabolism imbalances, malabsorption patterns and their causes

Oxygenation: factors affecting a lack of oxygenation of the tissues (iron, B12, stomach strength, etc.)

Brain function: Visual & auditory functions, memory, hyperactivity, sleep function, mental development.

CAUSES

Etiological factors that can be discovered include the following range of negative influences:

Big Field influences: Geopathic stress on the body due to gravity, ionic and magnetic fields.

Genetic influences: genetic traits and weaknesses that contribute to the current condition.

Environmental toxins: heavy metals, pollutants, solvents and chemicals that damage the energy field.

Organisms: bacterial, viral terrains, information as to why the immune system is not responding.

Electromagnetic: effects of ELF, computer and cell phone radiation, microwave, radio waves, etc.

Emotional states: an inventory of the key emotional toxins creating disruption and ill health.

Nutritional deficiencies: key nutrients that are depleted, including antioxidants and enzymes.

As you can see we are using a very advanced and in depth system and piece of equipment here that reveals more than many others therefore our depth of information acted upon is broad and provides us with a very different look at the whole being. Further information on the NES® system can be seen here <http://www.nutrienergetics.com> .

Case Study Progression

D was seen twice by me in a three month period during which time she took the recommended infoceuticals and followed some nutritional advice given to her during her consultation. D took the full 3 months to complete the infoceutical remedies and we then did a follow up and compared results. When choosing her infoceuticals I deviated slightly from standard base protocol in order to deliberately target the areas most obviously affected and in need of correction in order to reduce her symptoms.

Below there is a rundown on each infoceutical remedy she took, the clinical notes I made at the time, her two scans side by side with the areas dealt with circled and noted followed by her dosing schedule. There are other areas of imbalance showing in her scan readings but I have used my experience and discretion in choosing her infoceuticals.

You will notice that they have all cleared away completely in the time she took the infoceutical drops. D reported feeling a fair bit better by around midway through the protocol and was only able to achieve taking the infoceutical drops at around 9-12 drops. She needed a couple of days here and there to rest due to some healing reactions, namely mild headaches which are common and she found by taking my advice and increasing her water intake, they were reduced to nil.

Infoceuticals Used – Highlighted Areas Indicate Relevance to Current Condition.

ED4 - Nervous System Driver (Primary driver for nervous system function).

The nervous system helps control and integrate all body activities by sensing changes, interpreting them and reacting. It uses complex electrochemical signals and patterns, which include brain waves to achieve this and generates the Nervous System Driver field. The western lifestyle of over-stimulation, sensory over-load and mental over-activity can disturb the brain waves, particularly the delta waves (deep sleep) and alpha waves (relaxation).

The ED4 Infoceutical is designed to correct the balance of delta and alpha waves to promote a feeling of calmness and aid restful sleep.

ED4 promotes the generation of the whole nervous system energetic field, which is required for correct nervous system function and **neurological integrity**.

The nervous system driver field helps with the maturation process of the Neuroblasts (embryonic nerve cells).

Nervous System energy fields are adversely affected by the following pollutants, which ED4 has been designed to help assist with their removal:

Butanols (hydrocarbon solvents),

Chlorpyrifos (common organo phosphate pesticide),

Heptane (solvent),

Diphtheria vaccination

Rabies vaccination

Tetanus vaccination

ED8 - Stomach Driver (Primary driver for digestive functions).

The stomachs' primary physiological process is to receive and temporarily store food and drink. Its acidic environment kills off microbes and initiates protein digestion. Energetically the stomach and large intestine are linked. A mixture of peristaltic movements and chemical reactions involved in the break down and absorption of minerals, proteins, fats and carbohydrates within the GI tract generates the stomach driver field. Toxins in the GI tract are detrimental to the stomach driver field.

The ED8 Infoceutical has been designed to restore integrity to the stomach driver field.

This driver field reflects the efficiency of the entire digestive process including absorption & assimilation. It is also related to immune system reactions.

Research indicates the field is linked to **muscle stamina**, chronic chest conditions and breathing issues.

The Stomach Driver assists with the maturation process of granulocytes (**granular white blood cells**) and **basophils**.

The cocktail of "alien" chemicals that exist in today's food chain means many peoples digestive tracts are embedded with a large number of foreign chemicals. This has detrimental effects on the physiological and energetic functions of the stomach.

The use of ED 8 may aid with balancing intestinal flora.

Stomach energy fields do not function well with the following pollutants of which ED8 has been designed to help assist with their removal:

Fungicides

Electromagnetic radiation

Heavy metals - Antimony, Cadmium, Lead and Arsenic

Hepatitis A and B vaccinations

A short period of strong detox reactions may be experienced with this driver. Start with minimal dosage.

Energetic Integrator 2 - (Heart - Lung Meridians)

Energetic Integrator 2 is associated with the regulation of many body functions including those listed below. The EI 2 Infoceutical has been designed to restore integrity to this integrator where field errors have disrupted its function.

Keynotes

Cardiac tissue and heart function

Lung physiology and heart-lung interaction

Heart

Most of the heart pericardium, myocardium, endocardium and coronary tissue and AV/ SA nodes.

Lungs

Generally most of the lung & pulmonary tissue including the trachea. Not bronchioles.

Hormones

Estradiol, estrone, pregnenolone.

Emotion

Self identity (who you think you are). Head and heart conflicts, enthusiasm, love. Out breath/ sigh to releases emotions.

Damaged by

Organophosphates, pesticides, parasites.

Emotional Stress Release - ESR

The Emotional Stress Release (ESR) Infoceutical has been found to be **helpful for relieving general day to day stress.**

Stress results when incoming data is not correctly processed into patterns.

ESR has the effect of helping the medulla process data faster and thus resolves issues into correct patterns.

ESR can be used as an aid when an Infoceutical program results in emotional "flair ups" or the person is feeling low during the healing process.

When a person is "stressed" their ability to absorb food is compromised as is their ability to process thoughts. For this reason ESR has been found helpful in aiding nutrient absorption.

*** Note that her dosing with this was left to her discretion and that doses listed on her schedule are minimum amounts to be taken daily, up to 28 drops daily were allowed.*

Clinical Notes Made on First Visit

D presents with what she feels is a hormonal imbalance caused by the Implanon contraceptive implant. She has been suffering the symptoms of poor libido, moodiness, sore breasts and insomnia. She has a stressful job and has a history of stress related issues.

Initial protocol: ED4, 8, EI2, ESR

Scan reveals that D has issue at the areas of digestion, nervous system, hormone regulation, blood sugar regulation and liver areas. Seems she is also suffering the effects of prolonged stress and is under absorbing her nutrition as a result which is compounding the problem.

Watch: EI3- Red, ED6 – yellow, EI5 - orange

Aiming to reduce stress reactions and increase tolerances to stress, improve digestion and balance hormones estradiol, estrone, pregnenilone.

Emotional Stress Release		

Nerve driver has cleared away completely.

Stomach driver has cleared away completely.

Integrator 2 cleared. Points to the body now understanding better how to balance her estrogens.

Residual or retained stress has been resolved.

Follow Up Notes

D reports libido has returned to normal, breast soreness is greatly reduced and her moodiness is gone. Feeling much happier and has more vitality. Digestion is better and no bloating. Stress levels are reduced and she reports feeling more mentally calm. D feels her sleeping is almost back to normal. I have recommended no further infoceuticals at this time and to see how she settles.

*Footnote – Now a fortnight since last note. D reports she still feels great and is sleeping well. No return of prior symptoms and period is normal.

Dosing Schedule

Conclusions & Benefits

Clearly D had an obvious turn around in her condition and has had a fairly positive result in a relatively short period of time. Her recovery seems to be supported by the scan results and her continued wellbeing is a positive result for the effectiveness of NES assisting healing and correction in this case. Points to consider here are that no medical test presented her with any indication or diagnosis of a medical problem yet she still suffered from the symptoms according to her testimony. Prior treatments both medical and otherwise were limited in their effectiveness according to her testimony.

Results seem to indicate that the NES scan can locate the causal imbalances in this case more effectively and offer a real and effective method of correction and assistance than previously used methods and treatments.

All in all a successful program of therapy.
